

entelligently® improves employee wellbeing & helps manage energy costs

The way we use office buildings has fundamentally changed. This is partly due to the Covid-19 pandemic and also a more general change in our expectations of the working environment.

Buildings designed for 80-90% capacity now often operate at 20-40% or lower, leading to significant gaps between functional design and actual performance.

This shift has left building owners and operators grappling with higher energy costs despite lower occupancy, and a need to reimagine how space is utilized to meet the new expectations of flexible working.

Entelligently addresses these challenges by putting occupants at the center of building management, leveraging advanced sensor technology and predictive analytics to optimize comfort, energy efficiency, and space utilization.

Improved Occupant Wellbeing

By actively monitoring and adjusting environmental factors such as temperature, humidity, and CO2 levels, Entelligently enhances the well-being of building occupants, leading to increased productivity and satisfaction.

Enhanced Space Utilization

Real-time data helps facility managers identify underutilized spaces and optimize their use. Support for office hoteling and flexible workspace arrangements ensures that every inch of your building is used efficiently.

Cost Reduction

Efficient use of HVAC and lighting systems based on accurate data reduces operating costs and energy consumption. Entelligently helps you create a sustainable and cost-effective building management strategy.

Adaptability to Changing Needs

Entelligently supports flexible working arrangements, enabling building owners and operators to adapt to changing occupancy levels and reimagine space utilization. This flexibility helps attract and retain tenants who are looking for modern, adaptable work environments.

entelligently® improves employee wellbeing & helps manage energy costs. The more you use entelligently® the more intelligent your building becomes.

- Occupant-Centric Design
- Real-time data integration
- Predictive Analytics
- User-Friendly Interface

About **entelligently**[®]

Entelligently is revolutionizing the way buildings are managed, putting occupant well-being and sustainability at the forefront.

Rapid onboarding ensures immediate access to the mobile app, enhancing the well-being of occupants from day one. A seamless experience for both owners and occupiers provides valuable data insights within hours, empowering you to make informed decisions.

Entelligently reuses data from existing sensors or building management systems, complementing current facilities management investments and enabling managers to respond more effectively to both owner and user demands.

Entelligently optimizes your data to help you meet and exceed your ESG and SDG targets. By leveraging our platform, you can drive positive change and create a more sustainable future for all.

BDP architects implemented our platform at the Bright Building in Manchester, achieving remarkable results, including a 30% increase in occupant comfort and a 4% reduction in energy costs.
